

## WHY SAVE CORD BLOOD

### Life-Saving Potential

Cord blood is the blood that remains in the placenta and umbilical cord after a baby is delivered. It contains precious stem cells that can only be collected at birth!

**80+**  
TREATABLE DISEASES

**21,000+**  
CORD BLOOD UNITS  
BANKED WITH PROGENICS

**100%**  
MATCH FOR  
YOUR BABY

## CORD TISSUE

### Future Treatments

Cord tissue is a segment of the umbilical cord rich in mesenchymal stem cells (MSCs).

MSCs has the potential to treat various age related diseases, acute injuries, and cancers such as:

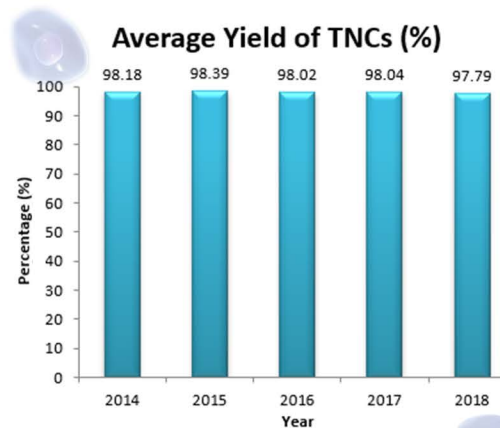

- Alzheimer's
- Birth Defects
- Arthritis
- Rectal Cancer
- Skin Burns
- Heart Disease

## WHY PROGENICS

### Consistent Quality

Using our modified double stem cell extraction method, Progenics consistently yields an average of **98%** of Total Nucleated Cells (TNCs).

Source: Progenics' database, 5 years data statistics

### Higher Viability of Stem Cells

Progenics is committed to processing cord blood and cord tissue units within the **first 24 hours** from collection. This would contribute to a higher yield and viability of stem cells, which is critical for a successful transplantation.

### Certificate of Cryopreservation

A certificate of cryopreservation that includes important quality indicators will be issued to the parents.

## SUCCESS STORIES

### Meet Naomi

Naomi was diagnosed with hemophagocytic lymphohistiocytosis. Luckily, her 4-year-old sister's cord blood stem cells were a match. The treatment turned out to be a success!

*"We feel very thankful for Progenics' services. This was an important factor in our daughter Naomi's transplant."*

- Naomi's parents

### Ask Adrian

Adrian was diagnosed with stage 4 Neuroblastoma (cancer of the nerve tissue) in 2007 when he was only 10 months old. As part of his treatment, he received a transplant of his own cord blood stem cells.

*"We are so happy that we made the choice of storing his cord blood at birth with Progenics though we never thought we would use it."*

- Adrian's parents

### BEDSIDE PICKUP

Complimentary within the GTA and surrounding areas.

### INFORMATION VIDEOS

Learn more about cord blood and cord tissue banking on our website.

### SEMINARS

Join other parents and ask our experts.

### LABORATORY TOUR

Visit our state-of-the-art processing facility.

### PERSONAL CONSULTATION

Contact us to arrange a one-on-one consultation.

### REFERRAL PROGRAM

Refer a friend and receive a year of storage honoured to both of your accounts.

### DIRECT DONATION PROGRAM

Do you have a family member with a disease treatable by stem cells? You may be eligible to bank with us for free.

### INTERNATIONAL BANKING

We welcome clients from outside of Canada.

### PROUDLY CANADIAN-OWNED

Founded in 2004, Toronto, Ontario.
